The Best
Windows
and Doors
in its Class

Welcome to Euro Window LLC

The front door is your house's business card.

Our doors are built to last. They are crafted from premium materials that are resistant to rot, rust, and corrosion, ensuring long-lasting performance and minimal maintenance.

At Euro Window LLC, your safety is our top priority. Our uPVC glass doors are designed with advanced locking mechanisms and reinforced frames. These features provide peace of mind, knowing your loved ones and valuables are secure. We don't compromise on safety, and neither should you.

Our doors are not just about aesthetics and security. They are also designed with your comfort and energy efficiency in mind. With their thermal insulation properties, our doors keep your space warm in winter and cool in summer, while reducing heat losses or gains. This also helps to minimize the transmission of external noise, creating a peaceful and quiet environment. And the best part? Maintaining them is a breeze. Just a simple wipe and they will retain their pristine appearance for many years, saving you time and effort.

When you buy from us, you make a good choice!

SIDELIGHTS

Sidelights are generally narrow, and vertical windows are installed alongside entryway doors. They allow natural light to enter space, making it brighter and more welcoming. Installing sidelights maximizes the amount of natural light that enters, reducing the need for artificial lighting during the day.

This can make your space more open and inviting while minimizing energy usage. They can enhance the overall visual appeal and add elegance and style to compliment your home.

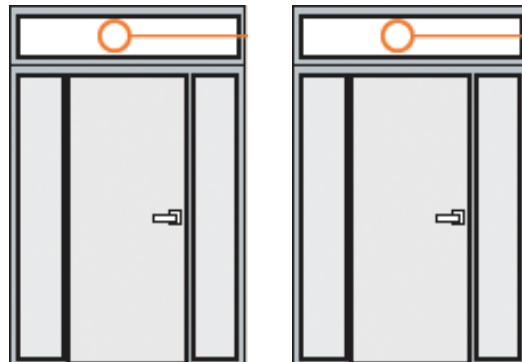

Sidelights can be fixed windows or operational tilt-and-turn style windows that allow you to ventilate the area.

Our sidelights are not only functional, but also customizable to match your unique style. They are available in a variety of configurations and glass types, including clear, frosted, tinted, or mirrored. This variety ensures that you can find the perfect sidelight to enhance the aesthetics of your home.

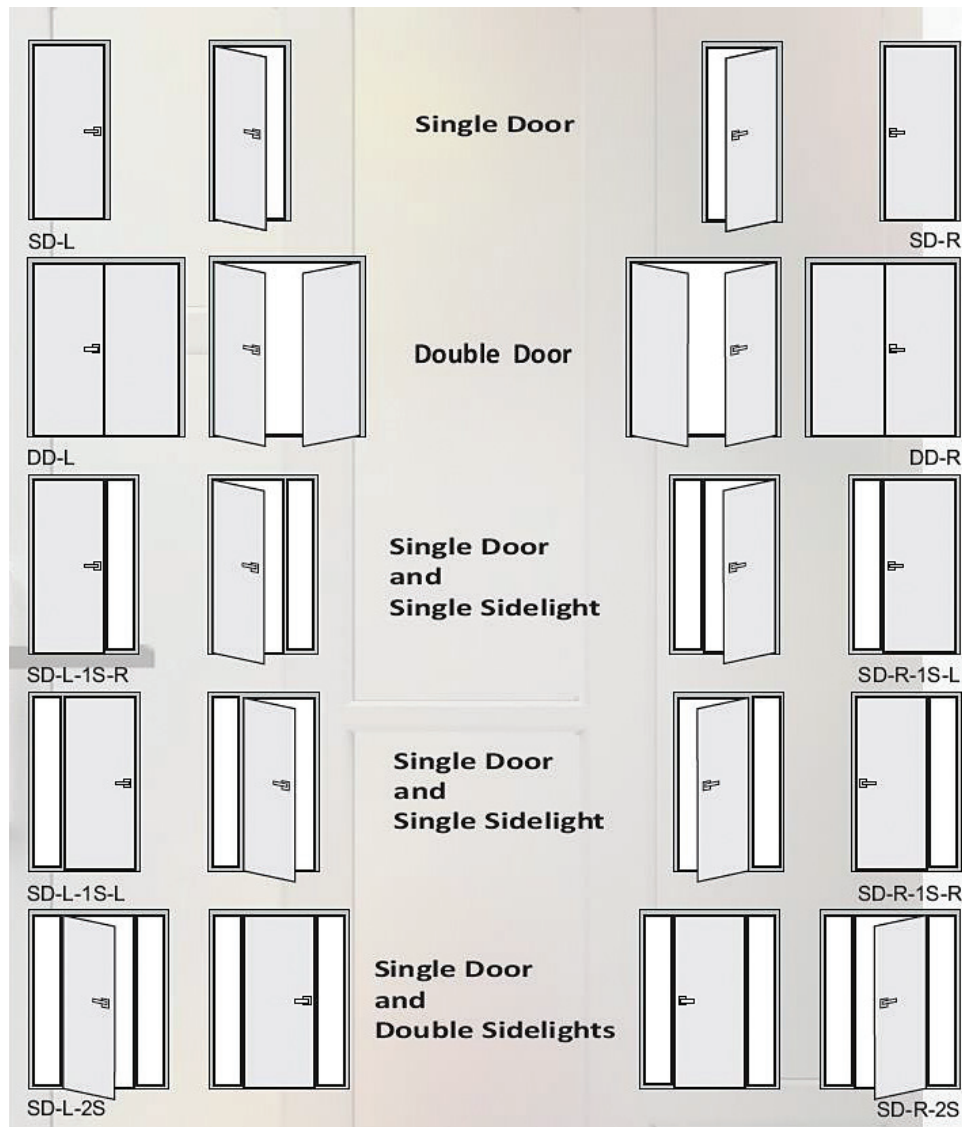

TRANSOM

Transoms allow extra natural light, brightening the room and reducing the need for artificial lighting throughout the day. A transom that matches the style of your windows and doors creates a visual flow and cohesiveness throughout the space. We can make each transom to size.

DOOR CONFIGURATION

COLORS & LAMINATES

Choosing the right color is very important when purchasing windows and doors, as their aesthetic will affect a significant part of your home or project. We offer many colors and laminates so you can find the perfect look to fit your needs. If you have a color from a different paint brand that you're trying to match, let us know, and we'll do our best to find the right RAL color that would match the closest to your request.

(Please note: We would need the paint brand's name and the paint's name or ID number to make an accurate color match. A photograph of a painted window or door would be insufficient to determine a near-perfect match correctly.)

Our Woodec and Aludec by Aluplast laminates are a great choice to add texture or a woodgrain look to your windows and doors. They are made from high-quality materials designed to be durable and long-lasting. They can withstand daily wear and tear without showing signs of damage or scratches. They do not require special cleaning agents or extensive maintenance routines. Regular cleaning with mild soap and water is sufficient to keep them looking their best for years to come.

HANDLES

DOOR HANDLES DUBLIN 35:

- Made of extruded aluminum
- processed with CNC machines
- Original, universal design
- Wide color pallet allowing an excellent match between the handles, other fittings, and overall interior design.

HOPPE aluminum handle set on the narrow backplate for profile doors:

- Bearing: fixed/movable door handles, maintenance-free slide bearing
- Connection: HOPPE solid spindle
- Base: stainless steel, supporting lugs
- Fixing: visible inside, bolt-through, M6 thread screws, cover caps for screw head

GLASS

Clear glass is our default window glass type. It is the standard type of glass that most windows use. Regular glass is practical and the most affordable type of glass when on a budget while still providing adequate performance.

Acid wash glass, often described as frosted glass, offers much more privacy than clear glass, as it is very difficult to see through. This glass is typically perfect for bathrooms or anywhere else where privacy would be a concern.

We offer a standard **grey tint**, as well as a **bronze tint**. Tinted windows can reduce the amount of heat entering through windows, and the film blocks a significant amount of harmful ultraviolet (UV) rays from the sun.

Tinted windows also provide an added layer of privacy and security by making it more difficult for people outside to see into your windows. They contribute to energy efficiency by reducing the heat gain in the summer and heat loss in the winter.

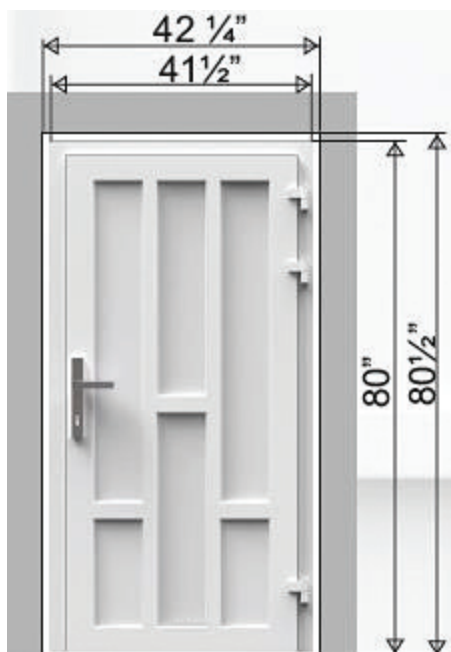

GREY TINT

BRONZE TINT

Mirropane windows, also known as one-way mirror glass, provide one-way visibility. This means that the side with the brighter lighting will appear as a mirror-like reflection, while the darker side will have a clear view through the glass. The effect is achieved by significantly changing lighting levels on either side of the glass. Besides enhanced privacy, Mirropane glass can also reflect a significant amount of heat, helping to reduce the amount of solar heat.

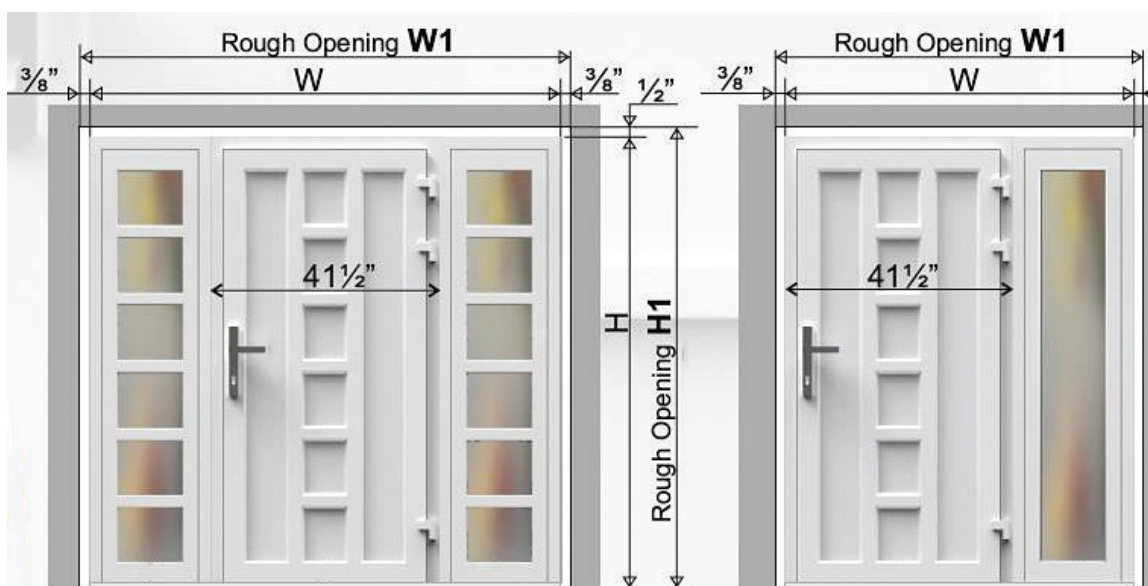

DOOR DIMENSIONS

After you decide to replace your front entry door, it's best to start by taking measurements so you can be prepared for conversations and receive an accurate quote. Having these measurements will ensure you will get an accurate quote from a Euro Window LLC representative. Below is an example of a measurement that may be helpful.

NOMINAL DOOR
41 1/2" X 80"

Rough Opening = 42 1/4" x 81 1/2"

Rough Opening = W1 X H1

W1 = W + 3/8"

H1 = H + 1/2"
